
Three scattering modes | synthetic triclinic fixture | neutral IT92 factors
Finite single crystal: 4 x 4 x 4 cells
k (l = 0)
h (reciprocal basis)
I(q) (electron²)
Finite-size fringes through (100)
2 x 2 x 2
4 x 4 x 4
8 x 8 x 8
|S|²/N²cell
h - 1
Finite PXRD cross-check: 2 x 2 x 2 cells
Finite Debye
Directional angular average
I(q) (electron²)
q (Å⁻¹)
Bulk PXRD: separate Bragg and diffuse measures
Bragg radial weights
Diffuse intensity
Bragg weight (electron² Å⁻¹/cell)
Diffuse (electron²/cell)
q (Å⁻¹)
